Your brain uses our five senses — sight, hearing, smell, taste, and touch — to figure out what's going on in the world

around you. This book shows how your senses work by combining easy-to-understand explanations with detailed illustrations for you to color. You'll also find out about similarities and differences between human and animal sensory perception. Discover the nervous system, the pathway of sensory information, and how neurons receive and send data. Read about synesthesia, an extreme form of perception that enables people to hear sounds in response to smell, feel something in response to sight, and experience other unusual sensory combinations. Learn about special animal

senses that detect heat, provide night vision, and alert birds, fish, and mammals to when it's time to migrate. These and other fascinating aspects of the senses are described and illustrated with 46 full-page illustrations to color.

*Straight Talk about Sex* Wilfrid Laurier Univ. Press

In this book, Graham Oppy examines arguments for and against the existence of God. He shows that none of these arguments is powerful enough to change the minds of reasonable participants in debates on the question of the existence of God. His conclusion is supported by detailed analyses of the arguments as well as by the development of a theory about the purpose of arguments and the criteria that should be used in judging whether or not arguments are successful. Oppy discusses the work of a wide array of philosophers, including Anselm, Aquinas, Descartes, Locke, Leibniz, Kant, Hume and, more recently, Plantinga, Dembski, White, Dawkins, Bergman, Gale and Pruss.

The kids in What I Like About Me, are as different as night and day. And, guess

what? They love it. Some adore the fact that their braces dazzle and gleam, others feel distinguished when they wear their glasses. This fun-loving book, with a mirror included on the last page, proves to kids that, in a world where fitting in is the norm, being different is what makes us special. Helping children learn about diversity, while fostering self-esteem, is what this super-sized Teacher Classroom Pack is all about. Teachers can read the rhyming text of the award-winning *What I Like About Me!* and use the oversized book to focus on differences in nationality, appearance, food, and more. Inviting children to look in the giant mirror will encourage them to think and talk about what they like best about themselves.

**LIFE** Page Street Publishing

While many parents and teachers believe it's okay to spank or physically punish their children in some manner to improve behavior the author believes otherwise. She explores the historical, psychological, sociological and legal foundations from a philosophical perspective presenting evidence showing that all forms of corporal punishment pose significant risks for children and that none improves behavior in the long term.
